Legal protection for patients

Legis^{sana} helps you defend your interests when you are confronted with a case of litigation for which no amicable settlement can be found.

No one is safe from a misdiagnosis or a medical error that can have serious consequences. When you are ill, securing a successful outcome without the support of competent lawyers and experts is difficult when dealing with medical institutions.

Legis^{sana} safeguards your interests in case of disputes with the medical profession (including physicians, dentists, surgeons and physiotherapists), hospitals, clinics or with any other medical facility.
